SPECIAL GUIDING PROGRAM

“The First Cast Mix and Match the Hatch”

You receive 3 X 4 hour units of your favourite hatches when they are at their best.

For example:

4 hrs fishing the Hendrickson Spinner fall during their drop!

4 hrs fishing the BWO's when their hot!

4 hrs fishing Tricos when they are a blizzard!

The full rate for three half days would be \$ 375 but the Mix and Match the Hatch price is a delicate \$ 300.

“The First Cast Short List!”

Add \$ 50 to your booking and get short listed for a last minute call (1 day or less) when we know the action is outrageous. That means that we were out fishing and a blizzard of fly/fish activity got us so excited that we had to give you a call! You have to get here right away!

“The First Cast Split Guide”

Sometimes you have to take the good with the bad. That means that a great morning of fishing ends with an afternoon of blistering heat and fish with lockjaw. Not any more!

\$ 250 for one person and \$ 350 for two people ensures that you fish the best part either side of the day.

For example:

Start at 7am fishing the early risers until 10 or 11am and take a siesta for a few hours, take the partner shopping or go for a brew at one of our local watering holes and then meet your guide to complete the rest of your 7 hour guide.

“The First Cast Supersize Your Guide”

You have had a great day on the river but the fish are still very hungry and your guide time is up. Do we drive back home or stay on the river? Provided the guide is not booked right after your booking you can “Supersize Your Guide” Additional hours can be added to your day at a rate of \$ 35 per hour.

“Many people have been intimidated by fly-fishing or rather by fly fishermen. The First Cast vision is to guide and teach people how to fly-fish better without the arrogance too often associated with our sport. Your day is about you and nature not about us.”

Bed & Breakfast Accommodations available upon request

*Goods and Services Tax, Gratuities and license fees (if required) extra. US Prices use current rate.
